Printing with the Sun: Alternative Photo Processes

Patricia Delker

August 16-20, 2010

9am to Noon

Supply fee: \$20.00/per person (which covers cost of cyanotype and VanDyke printing solutions).

- Crane's Platinotype 100% Cotton Rag paper, 11.5x14.5, 25 sheets. This paper is available from Photographer's Formulary web catalog, and may be available at art stores.
- Also bring a selection of transparent items like vintage lace, handkerchiefs, knitted/tatted remnants, large scale negatives, old glass plate negatives, dried leaves from trees, ferns, etc.
- If you don't have larger negatives (3.5 x 5 approx.), consider having transparencies made at a copy shop by having them enlarge or photocopy an image and then print it in negative form on transparency paper.
- Or, if you are computer printer savvy, you can enlarge a photo using Photoshop, put it in negative form and using an inkjet printer and Inkpress Transparency Film, make an enlarged negative on your own.
